

We manage and guarantee our clients confidentiality and data integrity. We are strongly committed to our clients satisfaction.

VALOREM group is ISO 9001:2008 and ISO 14001:2004 certified for the following activities:

Prospection, studies, development, purchase, funding, construction, sales and operation of projects and renewable energy plants

Our staff is trained to marine safety (BOSIET)

VALOREM group is a green energy operator, created in 1994. Independent and pioneer of wind energy in France, VALOREM is now a vertically integrated multi-RE operator covering all sectors: from preliminary studies to the operation and maintenance of renewable energy plants through to construction.

VALOREM's agencies are located close to the French coastline areas identified by the French State as most suitable to the development of offshore wind and MRE activities.

For almost 25 years, as a green energy operator, VALOREM group has secured a strong network of industrial and political partners, state services and institutions.

We are now able to provide services aligned with the specificities of the offshore and MRE market, the main objective being to include local economic content.
